Madhyamik - 78%

PROJECTS

Portfolio Website
- Created a responsive portfolio website using HTML, CSS, and JavaScript.
- Showcased projects, skills, and contact information.

Weather Web-App
- Developed a real-time weather web application with HTML, CSS, and JavaScript.
- Integrated Weather API for accurate data.
- Implemented features like search weather using location name.

To-do list web-App
- Designed and implemented a to-do list application using HTML, CSS, and JavaScript.
- Included features for adding, marking, and deleting tasks.
- Utilized local storage for persistent data.

User Login Page (PHP)
- Developed a secure user login page using PHP.
- Designed the front-end with HTML and CSS, ensuring a user-friendly interface.
